CRM^{FIRST}

Digital contract management for Microsoft Dynamics 365 and Power Platform

AVOID UNNECESSARY COSTS AND ADDITIONAL WORK WITH FULLY AUTOMATED CONTRACT MANAGEMENT

Sounds familiar?

Contracts are often managed outside the central business process – in Excel spreadsheets, email threads, or folder structures. This makes it difficult to keep track of deadlines, track changes, or respond in good time.

The result: unnecessary costs, manual errors, and a lack of transparency.

The solution: digital contract management!

proCONTRACTS allows you to manage, share, and sign all contracts directly within Microsoft Dynamics 365 or the Power Platform. The solution integrates completely into your existing CRM system – for a better overview, less effort, and improved decision-making.

All the contract data is centrally available and can be updated, commented on, or sent for signature with just a few quick clicks. This enables all stakeholders to collaborate in a structured way – without any media discontinuities or information loss.

How you benefit at a glance:

- 20% time savings per contract
- Automatic deadline monitoring – no more costly oversights
- Digital signatures via DocuSign or Adobe Sign
- 360° overview of deadlines, payment terms, and responsibilities
- AI-powered digitization of paper contracts
- Efficient collaboration through integrated redlining and approval processes
- Fewer errors thanks to validated templates and automated workflows
- Swift implementation without any need for additional interfaces – including training and customization

Would you like to make your contract management processes more efficient?
