

ORBIS: MANUFACTURING
& LOGISTICS for GROW
with SAP

ORBIS: MANUFACTURING & LOGISTICS for GROW with SAP

SAP® Qualified
Partner-Packaged Solution

The challenges you face are what drive us to innovate

Nowadays, the manufacturing industry has to respond quickly and flexibly to customer requests, and is in the midst of a dynamic and digital transformation. Global trends such as **advancing globalization**, the constant threat of **cybercrime**, financial **uncertainties** and unpredictable **fluctuations in demand** are placing companies under an increasing amount of pressure. The increasing complexity of **supply chains**, **price pressure**, **capital tied up in stock** and **resource problems**, exacerbated by **outdated** and **non-integrated IT systems** or many different contractual partners, only make these challenges even tougher.

So companies are faced with the pressing task of developing efficient **growth strategies** and adapting to new requirements. A **modern cloud ERP solution** is essential to meeting these challenges. SAP has launched the new GROW with SAP bundle – an offer that includes the **S/4HANA Public Edition** at its core, best practices, services for faster implementation, an active user community and exclusive learning opportunities.

GROW with SAP also paves the way for your limitless growth!

Why choose SAP S/4HANA Cloud?

Continuous innovation

Stay up to date at all times with the latest upgrades, which are fully managed by SAP! Experience continuous innovation and maximum flexibility with minimum operating costs!

Insights and artificial intelligence

Use real-time analyses and the latest technologies such as integrated artificial intelligence, machine learning and robot-controlled process automation.

Embedded best practices and preconfigured processes

Benefit from a high degree of standardization by providing end-to-end business processes with industry best practices and integrated localization that can be used worldwide.

Security, compliance and scalability

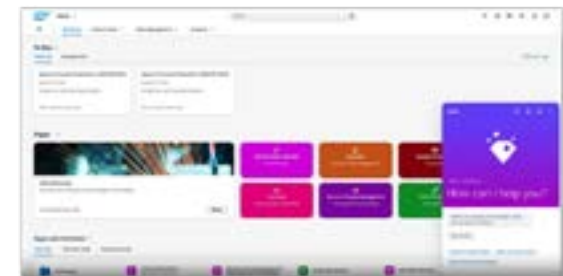

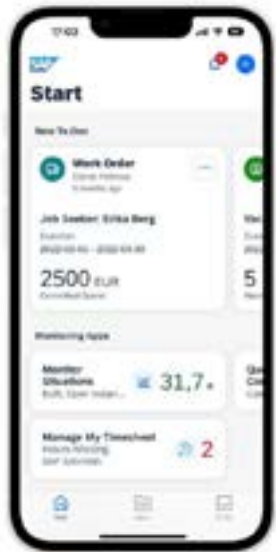

Sit back and relax! With SaaS provisioning, SAP handles the technical operation, system maintenance, upgrades and data protection.

Openness and expandability

Expand your options with ready-to-use APIs, side-by-side extensions and ABAP extensions according to the "Keep the core clean" principle.

High user experience

With SAP Fiori, you benefit from an intuitive and user-friendly interface that minimizes training and familiarization time. You also have access to the ERP solution anywhere and at any time, whether you're in a single location or on the move.

Maximize your growth potential with GROW with SAP and SAP S/4HANA Public Edition

- ✓ **GROW with SAP** with the S/4HANA Public Edition as a ready-to-use cloud ERP with preconfigured industry processes
- ✓ **Business Technology Platform (BTP)** for add-ons, proprietary developments and integrations
- ✓ **SAP Cloud ALM** as a project management tool for implementation, further system administration and testing (application lifecycle management)
- ✓ Central system configuration with **SAP Central Business Configuration (CBC)**
- ✓ Individual **learning and training** offers as a self-service
- ✓ Access to the active **SAP community of experts** between SAP experts, partners and customers

ORBIS GROW package – scope
